# *Please Read Before Ordering*

**SMALL ORDERS:** Because of the low prices quoted in this catalog, and the high cost of filling small orders, we must request that orders sent to us be for an amount not less than \$3.00.

**PARCELS POST CHARGES:** Orders of from one to ten roots, can generally be shipped cheaper by parcels post. Larger orders should go by express or freight. Owing to the multiplicity of Parcels Post rates to the various Parcels Post zones, we request all "cash-in-advance" customers who desire shipments to be made by Parcels Post, to remit fifteen cents extra for the first root and five cents extra for each additional root. With this arrangement, we anticipate that our losses and gains on postage will be about equal.

**GIVE US SHIPPING INSTRUCTIONS:** When ordering please give full shipping address when different from postoffice, and state whether you desire shipment via express or freight.

**SIZE OF ROOTS:** Our prices are based on liberal, well balanced three to five eye divisions, cut from young, thrifty plants and which should not be confused with divisions cut from old commercial cut-flower clumps that may have lost much of their vitality. The three to five eye divisions, through years of thorough testing, have proven to be the most satisfactory and economical size to buy and we recommend them to our customers.

**WHEN WE SHIP:** We begin shipping as soon after September first as conditions will permit, and we continue shipping throughout the months of September, October and November, all of which months are equally suitable for successful planting of Peonies. (Fall is the natural season for planting Peonies.)

**TERMS:** Remittance in full with order, less five per cent, from individuals or companies not satisfactorily rated. Others, five per cent for remittance with order or before date of shipment; two per cent ten days; net thirty days. Special terms by agreement. All quotations f. o. b. Berlin, Maryland, subject to stock being unsold upon receipt of order. All contracts and agreements are made subject to flood, drouth, fire, frost, crop failure or other causes beyond our control.

## **10% DISCOUNT ON EARLY ORDERS FOR FALL SHIPMENT.**

Early orders are a benefit to both buyer and seller, so as a special inducement, we are offering to our customers A Discount of Ten Per Cent from catalog prices, on all orders accompanied by remittance in full, which reach us on or before August fifteenth. This is a special discount and is not in addition to the regular discounts named under "terms."

**PRICES ARE F. O. B. BERLIN, MARYLAND.** No extra charge will be made for packing or package on orders sold at prices quoted in this catalog.

**NON-WARRANTY:** We give no warranty expressed or implied after plants have passed beyond our control, the purchaser assuming all risk and responsibility of planting, growth and life of stock. We exercise the greatest care to keep our plants true to name and are willing at any time to replace from our own stock, on proper proof, all stock that may prove otherwise, or refund the amount paid, but it is mutually agreed that we shall not at any time be liable for a greater amount than the original cost.

**COMPLAINTS:** Complaints covering packing, quality or count must be made to us within five days after receipt of stock.

**HARMEL PEONY COMPANY.**

## When Better Peonies Are Originated We Will Grow Them

FROM year to year, we have continued our policy of trial and elimination because we are convinced that the best interests of our customers will be served by a minimum number of varieties, to include only the best of the old and the new—those which we confidently believe to be the most distinctive and beautiful in form and color, the strongest growers, and the most reliable bloomers, as well as the most generally satisfactory and profitable cut-flower varieties in existence.

For various reasons, however it will be impossible for us to offer each year all of the varieties we are growing but we hope to always offer a list containing some of the finest new varieties, as well as the commercial kinds. Our customers, in buying Peonies from us, may do so with the definite assurance that our list of varieties will constantly improve as newer and better varieties are made available.

We wish to assure our customers that we have consistently maintained our usual high standard in properly caring for our Peonies, and in keeping them true to name. Our customers will have all orders filled with only the best quality roots, cut from young thrifty plants, liberally graded and true to name—just such roots as we, ourselves would be proud to receive and plant.

Sincerely,

HARMEL PEONY COMPANY.

**“THE LIBERAL SIZE AND FINE QUALITY OF OUR  
WELL BALANCED DIVISIONS, WILL PLEASE YOU,”**

## Best Varieties For Commercial Cut-Flowers

Many varieties of Peonies, even including some of those carrying the highest ratings, because of certain peculiarities of growth or flower, are entirely unsuitable for commercial cut-flowers, and would prove to be unsatisfactory and unprofitable if planted for that purpose.

The varieties which we name below have withstood the acid test of commercial growing, where none but the most reliable and prolific bloomers are tolerated, and we can unhesitatingly recommend them for producing profitable crops of commercial cut-flowers.

Most of these varieties we can furnish in quantities of 1,000, 5,000, 10,000 or more. (See General List for descriptions and prices.)

# Cut-Flower Demand and Profits

**THE DEMAND**, through the florists, for cut-flowers, increases amazingly each year, indicating that the general public is more and more becoming convinced that the Peony stands supreme as THE cut-flower of its season, and with millions of people in our country who do not yet know the beauty and satisfaction of the modern Peony, this demand will be sure to continue to increase for many years to come.

**EXCELLENT PROFITS** are being made from large plantings of Peonies of varieties especially adapted to commercial cut-flower production. We have customers whose net profits per year have exceeded One Thousand Dollars per acre. About 2,700 to 5,000 plants are required to set an acre. Plant an acre to Peonies—it should prove to be the most profitable acre you own.

We have devoted twenty-three years to learning the most profitable and satisfactory Peonies for commercial cut-flower planting, and in building up adequate stocks of these varieties to supply our customers.

WE SELL LARGE ORDERS EACH YEAR TO SOME OF THE HEAVIEST BUYERS OF PEONIES AND WE FEEL THAT OUR PEONIES WILL ALSO PLEASE YOU.

## Suggestions for Planting

**WHEN TO PLANT:** Peonies should be planted in the fall, and are equally successful when planted at any time from September first until the ground freezes too deep to allow planting.

**LOCATION:** Select a good soil and a location for your Peonies that is well drained, and which will be in full sun at least part of the day. Avoid planting in low wet ground, close to buildings or large trees or among too much shrubbery. Do not plant Peonies in very sandy soil—they are not likely to succeed.

**PREPARATION OF SOIL:** Soil should be well prepared by plowing or spading and cultivating to a depth of eight inches or more and allowed to settle for a few days prior to setting the roots. An application of raw ground bone (bone meal) thoroughly mixed with the soil at planting time, will supply sufficient plant food for a year or two. A top dressing of hardwood ashes, applied in early spring, would assist in quick root development. Do not use fresh manure about Peonies.

**SETTING THE PLANTS:** Set the roots, after all labels have been removed, in the prepared soil, in their natural position, eyes or buds up, and at a depth so that the eyes will not be over two inches below the surface after the soil and the roots have settled. Work the loose soil carefully around the roots, packing it firmly to hold the roots in position. The common mistake is planting too deeply. Watch and see that the eyes are not more than two inches below the surface. The roots should be spaced three to four feet apart.

On some types of soil, a light covering of straw or leaves for the first winter will prevent the newly set roots from heaving out because of alternate freezing and thawing. Carefully remove covering of straw or leaves from directly over the plants, in early spring, before Peonies come through the ground. When Peonies are up a few inches, cultivate thoroughly and often throughout the growing season.

**COMMERCIAL PLANTINGS.** For permanent cut-flower planting, rows may be four feet apart, plants three feet apart in the row, or 3½ x 3½ feet will be preferred by some, with new eyes two inches below the surface of the ground. Some growers plant as close as 3 x 3 feet, and others 4 x 4 feet.

# Spring Shipments

Spring planted Peonies do not always give satisfactory results. (Fall is the normal season for planting Peonies).

Peonies begin growing early in the spring, therefore it is necessary to plant roots very early.

We would suggest to our customers who wish Peonies shipped in the spring, that they place orders with us as early as possible—certainly by March tenth, and earlier would be best.

## Will You Do Us A Favor?

Our catalog will be effective only when it reaches the hands of those who are potential buyers of Peonies.

In case you happen not to be interested in Peonies at this particular time, we would deem it a considerable favor if you would assist us by passing this Catalog along to someone who might be interested. Thanks!

## Ten Per Cent Discount

Early orders are a benefit to both buyer and seller, so as a special inducement, we are offering to our customers
